## SWEEP AWAY!

St. Rose's Catholic Church and Parsonage are Licked Up by the Fire Fiend

The Hottest Fire That Ever Visited Cloverport Was That of Last Wednesday.

Two Large and Beautiful Buildings, Ornaments of the City, Are No More.

Other Property Was Saved Only Through the Untiring Labors of Brave Workers.

## ORIGIN A MYSTERY.

The beautiful St. Rose's Catholic church and parsonage were destroyed by fire this city last Wednesday evening, the 25th ult.

At about 2:30 o'clock a heavy cloud of smoke was seen issuing from the top of the church. The alarm of fire was given and the ringing of the church bells and school bells soon brought about the entire population of the city to the scene.

The fire seemed to be coming from the ceiling and the wall near the roof at the east end of the church. Soon a hole was burned through, and a draft almost instantly swept the flames to the tower at the west end, which acted as a flue, and the side building was fired on the inside next the roof.

The pastor, Rev. George Nicholas, was in the study room, and knowing the bad shape that the tower was in for fighting fire, he prepared for the worst. Willing helping hands responded to the alarm, but there was no hope of saving the building, and the people began to remove the organ and articles about the altar.

The flames roared like a railroad train, and soon the fire tongues were shooting heavenward from all parts of the building. The great bell in the steeple became loose and came crashing down through the tower scattering fire brands in every direction. It struck the lower floor with a resounding crash, where it laid and melted in the intense heat. The iron roof swelled and heaved like the waves of the ocean, then curled up into rolls and crashed down through the building, carrying with it the floor and the walls, and where a few minutes before stood the beautiful little Catholic church, was a raging sea of wicked flames.

The parsonage stood only a few feet away. It was a large two-story frame building, used as a home by the pastor and James Galligan. At about the time the church fell in, this building caught and fire spread over it with a flash while the people were still in it carrying out furniture. It was soon a blazing mass, and was entirely consumed.

The next nearest building was a dwelling owned by J. K. Woods, but occupied by George Harris and family. All the furniture was removed from this building, but it was saved by covering it with blankets and sprays of water, and the water. All the out buildings and fencing on the Catholic lot were destroyed, and other buildings in the square were frequently on fire, but they were watched and put out before heavy damage could be done.

Both the buildings were neat frame structures, only recently built. There was an insurance of \$2,000 on the church and \$1,000 on the parsonage. The estimated loss is \$10,000. The furniture was all saved, though it was greatly damaged by being scorched and broken up.

Early Thursday morning the ruins were still smoking a subscription list was in circulation, to assist in rebuilding at once, and as we go to press we learn that success is crowning the efforts. On Sunday services were held in the "Red Front" Hall, and steps were taken to push the work of rebuilding. Messrs. Joe Friel, Benedict Beavin and James Lewis were appointed a building committee to assist the pastor.

The congregation has the sympathy of the community, and the News hopes that it will have the pleasure of soon reporting the laying of the cornerstone for a new, handsome brick church.

NOTES.  
 Stand firm Catholic friends.  
 No one was hurt at the fire.  
 The fire department did noble work.  
 Every church is the pride of a town.  
 Boys, there are the hooks to fight with.  
 The bucket brigade was promptly on hand.  
 The News heretofore "cheer up and try hard".

The Catholic church bell is silent-moiled.  
 The Catholics worshipped at the "Red Front" Sunday.  
 Go to the "Red Front" this evening and to-morrow.

Mrs. Galligan was among the last persons who escaped from the doomed parsonage.  
 More than a thousand people—men, women and children—witnessed the conflagration.

The heavy snow just going off the roofs was all that saved the West End of Cloverport.

A telegram was sent to the Bishop at Louisville, while the fire was in progress, notifying him of the fact.

Carl Richardson, of Union Star, was among the hard workers, carrying out furniture and saving property.  
 Wayman Furrow was careful enough to pull off his coat and hang it on some shrubbery in the parsonage yard. The coat was never taken off that bush.

Water Works for Cloverport is a Probability in the Near Future.

A Rousing Mass Meeting of Citizens Which Had a Business Ring to It.

FORMING A COMPANY.

Promised to call the citizens of Cloverport met in the City Hall last Friday night to consider the water-works question.

A large crowd of representative people was present, and the meeting decidedly had a business ring to it.

James J. R. DeHaven was chosen President and J. D. Gregory Secretary of the meeting. Messrs. F. J. Ferry, Frank Frazer and L. S. Sulzer spoke favoring the project and were willing to encourage it liberally in a financial way.

On motion of Hon. D. R. Murray a Committee was appointed to form a plan for forming a company and report at another meeting when, if the plan was accepted a book would be opened for subscriptions. Following are the names of the Committee: D. R. Murray, F. J. Ferry, Frank Frazer, J. C. Nollan and H. A. Ochs.

The meeting then adjourned 'till Tuesday night.

The Committee met Saturday afternoon and formed a plan of organization. It was thought that \$25,000 would be sufficient to erect efficient works to supply the city of Cloverport with water, the water she needs, considering our natural advantages. Of this amount \$7,500 will be paid in by a company of Cloverport citizens, and bonds to the amount of \$7,500 will be issued in shares of \$10 each. This will give the man of small means an opportunity to assist in the enterprise by subscribing for few shares.

The Company proposes to pipe the city and furnish it fire plugs for which the city will be requested to pay annual \$1,000. This is thought to be fair, as there of course will be many property holders who will not put any money in the works, but will get their property protected all the same.

Never before did Cloverport realize so completely her hollowness. In case of fire, as she did last Wednesday, when the Catholic church was burning. About all that we can now do is to stand by and watch our houses burn, when they once get under good headway, and if we make no better defense than we now have, it is only a matter of time when the beautiful little city of Cloverport will be except from the history of the Bourbon Stock Yards, at this season of the year, have cattle sold as low as they did Monday.
